"Western Observer," published by M. W. Gostin at Richland, Mo., is a live little paper and carries weight sufficient to entitle it to a first class county paper. The people of Rich, land should sustain Bro. Gustin in the way of

The United States Senate has resolved itself into a close corporation to secure power and the spoils for the beneat of the Senate and their respective adherents. The people are nowhere, party everything. Let their be a day of reckoning.

Boston is getting to be a large outlet for within the last two years. Since the first of the year the increase of the grain and propounds of fresh beer, During the present year 6,000 carcasses of mutton have been exported; also 15,000 live cattle, 700 hogs, and 4,000 sheep.

The Czar of Russia has been notified that he has been condemned to death by the Nihilists, and although he has taken the precaution to surround his residence with a cordon of soldiers his life will be at all times in great danger as the Nibilists have agents in every department of the government employ, and the probability is that be will one day meet the fate of his father. This certainly is a very deplorable condition of affairs,

A well known member of the Chicago bar on being asked his opinion about helt, gave a very severe criticism of the current theology when he raplied, "After close observation, I discover that the preachers have a habit of consigning to hell those whom I most respect, while they send to heaven those who, it seems to me, do not amount to much in this world; hence, I infer that while heaven doubtless has the advantage in point of climate, hell has the unquestioned advantage in point of acciety.

On the 23rd and 25th of April the Governor, Secretary of State and Attorney General re-districted the State into Senatorial dis-tricts under which Maries falls into the Fourteenth District composed of the counties of Cole, Cooper, Maries, Miller, Moniteau and Morgao, baying a population of 78 785-Democratic, 7,527; Republican, 5 977; Greenback, 1,207. Being an even numbered district, a Senator will be elected at the next general election.—Maries county Courier.

Enterprises of considerable gractical importance to the people of the Southwestern States are now being pushed forward to Europe. The latest is the formation of a company in France with a capital stock of The world moves, and the National Green-30,000,000 france, the special object of which back party is about the fastest growing plant 20,000,000 francs, the special object of which is to import American live stock direct to that country, instead of an baretofore by way of England. An organization has already been effected, and the undertaking promises to be a success. The company, we a u told, has had an agent for some time to the West argaged in making purchases, the first shipments it is expected will be made in the course of a month. For the time being the association will slip by current steamers, but it is their intention to build a line of their own with wessels specially constructed for that trade. If circumstances warrant their so doing the company will instruct their agent doing the company will instruct their agent to purchase a tract of land somewhere in the uthwest, whereon they can raise their own

MI3SOURI.

The New York Economist, after referring to the action of the Osperal Assembly ap propriating \$20,000 to the Immigration Socie ty, spenies as follows of the advantages and

resources of our State: "The State of Missouri is one of the most remarkable pieces of the earth's surface, Surface, indeed! Missouri goes far enough under the surface to furnish mankind with under the surface to furnish manyind with one hundred million tons of equi a year for thirtoen hundred years. Think of 29 887, square miles of coal beds—nearly heli the dister—and some of the beds nearly 15 feet thick. With regard to iron it is not necessary to penutrate the surface for that. They have iron in Missouri by the mountain. Pilot Kach 881 feet they are constant. Knob, 281 feet high, and containing 360 acres, is a mass of Iron; and Iron Mountain, about is a mass of Fron, and from Apuntain, about aix miles from it, is 238 feet high, covers 500 acres, and is estimated in the last surveys to contain 230,000,000 tons of ore, without counting the locabaustible supply that may reasonably he supposed to exist below the level. There is enough from lying about loose in Missouri for a double track of railroad across the continent, "The lead districts of Missouri include

"The lead districts of Missouri include more than 6,000 square celles, and at least five bondred points where it can be profitably worked. In fifteen counties there is copper in rich abundance. There are large desposits of sinc in the State. There is gold also, which does not attract much attention, because of the dataling stores further west, in short, within one hundred miles of St. Louis the following metals are found in quantities that will repay working: Gold, iron, lead, sinc, copper, tin, silver, platina, nickel, emery, coal, ilmestone, granite, pipe-clay, fire-clay, metallic, paints, and salt. The State contains 45,000,000 acres of land. Eight millions of these acres have the rich soil that millions of these acres have the rich soil that is peculiarly suited to the relator of hemp. There are five millions of acres among the heat in the world for the graps. Twenty millions acres are good farming and adopted to the critical relations. to the ordinary crops of the northern farmer. Two million acres are mining lands. Unlike most of the prairie States, Missouri possesses rich timber land, and is not deficient in this aggree of wealth."

A Handsome Paper.

The ILLUSTRATED SCIENTIFIC NEWS for May is before us, looking handsomer, if possible, than any of the prec ding issues. Since its change of publishers last January, this magazine has improved with each succeeding number. The present issue of the LLUTRATED SCIENTIFIC NEWS is overflowing with handsome engravings and interesting and instructive matter.

Among the various subjects illustrated in this baue is a superb specimes of cut glass. ware; an exhaustive article on asphaltum and its use in streets and pavements; a new and ingenious hand car, shown in operation; s new steel steamer for use in shallow rivers; the new Jobert telescope, and an interesting paper on physics without apparatus, also fully Illustrated.

Every number contains thirty-two pages full of engravings of novelties in science and the uneful arts. To be had of all news dealers, or by mall of the publishers, MUNN & Co., 37 Park Row, New York, at \$1.50 per annum; single copies 15 cents.

Here are a few figures which will bear studying. Church property is not taxed. The total value of church property as returned Western produce. The foreign atosmers run- for the census of 1880 was \$354,483,531. Of ning to the port have increased several fold this amount tan eleven leading denomina-

tions returned the tonowing.

Greenback Scisserings.

We want none tut lawfol money. Enact good laws and, repeal all bad ones, Now is the time to prepare for Natinonal Greenback picnies.

Orffanize National cluba in every village, town and city. Legal money is cheaper and better than

promissory notes. Every vote for the National party is a vote in behalf of labor, peace and plenty,

If greenbacks are not money, what are national back notes? A definite answer wanted.

Converts are coming into our ranks rapidly, and the old party leaders are alarmed,

Leading Democrats and Republicans in Kansas are joining the National Greenback party, In no State in the Union is interest so high as in the gold currency State of California.

Never were the prospects, for the ultimate success of the Greenback cause, so bright as

The Ohio Nationals are struggling to over-come the effects of fusion in the Ewing canvar. The Greenbackers of Pennslyvania will hold their State Convention and plenic at Pottsvilla in June.

The National party in Ohio county, Kv., have nominated Mr. Wesley Crow for the Logislature.

The colored National Greenbackers Mississippi talk of starting a Greenback paper. Success to them.

on the planet to-day. The question of tyrants is how to keep control. The question with true statesmen is how heat to serve the people.

Four hundred years before Christ, Plate taught that domestic money should not pos-

sess intrinsic or commodity value. One average bondholder is as expensive a cause to the county as 30 average training or paupers.

"Cradit can be kept within its apprep and safe limits, only by a sufficiency of cur-

rency."-Steele, From all parts of the country the cry goes up, "We want reduces from grinding

oppression. The people demand justice and equity. The Bondholder demands unjust privileges and class legislation.

We have received from L. H. Rogers, New York, a "Bird's Eye View of the English Language," a regular monument of patience. The sheet is 22x33 inches, and contains more information for persons who write letters than information for persons who write letters than we ever saw or thought could be arranged on one sheet. Frice 25:ts. The first part contains Rules for Spalling and Punctuation, also Rules for Using Capital Letters and Letter Writing. Next is a "Birds Eye View of the Correct Spelling of 25,900 Words." Every word is before you at a single glance, and is easily found by a system of indexing, that is wonderful, thorough and complete. There is also a "Bird's Eye View of 50,000 Syngayam" also a "Bird'a Eye View of 10,000 Synonyms," which is of great assistance to writers. which is of great assistance to writers. One of the most interesting restures, which alone is worth the small price of the sheat, is a list of 3,000 Words of Himilar Fronunciation, such as; The Golonel ata the Kernel. The Mayor owned a fast trotting fishers. A bottle of Scant cannot be Sent by mail for a Cost. The doctor's Patients were out of Patience at not being Allowed to call Aloud to the Assistants for Assistance. I Missel my way in the Mist, &c., &c. The sheet can be used to good advantage by every one who writes the gold advantage by every one who writes the English Languege. The sheets are sent by mail, postage prepaid, by the publisher. L. H. Rogers, 75 Maiden Lane, Naw York City. Price 25 cents each, or five sheets for one

Dollar. Postage siamps received in pay-

Prof. Lewis, of Rochester, N. Y., has discovered a current in, the constellation of Andromeda, thereby winning a \$200 prize offered by H. H. Warper.

The death-rate in New York is steadily mounting up-was last week 814, aginet 753 the week previous. Deaths from smallpoz, diphtheris, typhus and typhoid fever are icoreasing.

Sixty thousand emigrants landed at New York during the mouth of April.

Reapportionment of the State into sonatorial Districts,

The governor, secretary of state and attorney general met on the 23rd and 25th of April and redistricted the state into senatoris; districts, as required of them by the constitution, the late general assembly having falled to perform that duty. This 22nd district is composed of the fellowing counties: Phelps, Phiaski, Lacleds, Dent, Howell, Shannon, Texas, and Whight; population, 75,721. Democratic, 5,725, Republican, 3,590; Greenback, 2 244.

By this reapportionment Crawford county is in the Franklin county district. Marine; and Miller goes into the Cole county district Camden into the Saline district.

By kindness of our friend H. C. Jackson of Ulman Ridge, we make a few extracts from letters he has received from parties making inquiries about Miller county, Mo.

St Patrick's P. C., Clark Co., Mo. April 10, 1881.

Mr. H. C. Jackeon, —Sir. I saw your name in Colman.s Roral World, and being anxous to get some information from your part of the state, I would sak you to give me all the information you can in regard to Miller and adjuding countries. I am thinking of going to look out a leastion this spring, after I put in a crop of out I want to find the place and then move in the fall.

Yours Respectfully, E. W. Ryan.

Mr. H. C. Jickson,—Sir: I see in the Col man's Eural World, a piece from you about a aheep raget on the Osage. Will you please write and tell me if you know about what this land will cost; if a man could get a good place to live on it, or close to to it, where his family sould have health and he could send his chiliren to achool, and what kind of timber is on it; tell me how to come to it from St. Louis, how far is it from railroad. Let me hear from you, and oblige.

Yours traiy, Leane F. Smith.

Louisiana. Mo.
April 11. 1881.
Mr. H. C. Jackson, — Dear Sir: Your letter in Colomo's Rural World has interested me very much, and I wish to make some in quiry shoot the Osage river much you speak of. Is it bottom or over flowed land, or is it hilly, or proze land principly; if timber, what kind, large and time or torobby oak, and do you think a saw mill could do well; is it north or south of the river, and how far from the mirroad, could it be leased for a ranch, or bought; say what price it you can, has it say improvements or house on it, and as ranch, or bought; say what price it you can, has it any improvements or house on it, and it the country settled up around if I want to leave here and want to go some where to handle sheep and cattle. We have had the worst whiter here I over saw in any country; icel all gone and furmers are losing their stock from poverty; but few lambs will be raised, wheat is yet in the clods and looking very bad, not yet thawed out, show on the ground in some places jet. Michael answer soon and oblidge. Your friend,

J. L. Lingenfelter.

J. L. Lingonfelter.

Burlington, Iewa.

April 15, 1881.

Mr. Jackson,—I see in your article in the Rural World you speak of U.S. land. I am a general wood-working machine, carpenter, cubinet maker, corr.ine turner, patiano maker, etc. I bays heard before there was government land in southern Mo., is there any that you think would answer my purpose! I don't care about more than 10 or 20 acres of goos siliable land. I would like to be within reach of markets, and please tell me a little more of the general features of that country.

Obediently yours,

H. Sawier,

Church Collection at Red Gulch

"What is the sate?" whispered a Red Gulen miner with a single \$29 gold piece to the deacon with the collection plate in the Baptist Church at Black Run, Col. He was told to contribute whatever he chose, where upon he said he would chip in \$1, and pro ceeded to take \$19 in change. The deapon softly replied that no change was given. A struggle ensued, the plate was upset, and the congregation was in the act of "jumping the descon's claim," when the minister, an old Californian, leaned over the pulpit with a large navy revolver, and observed: "The brethern will please take notice that I've got the drop on them, and may brother who declines to go to his sent, or who touches any of that money, will have a funeral at his house to-morrow at 2 o'clock p. m. Our mining friend from Red Gulch will kindly release the descou's throat, or he is a dead man." The \$20 gold piece went to save the heathen .- Lasdyille News.

A Louisville paper tells how a Mrs. Isaacs of that city ran a needle in her foot nine years ago. Lest week the self-same needle worked out of the thigh of her third child, a baby of one year. The Emirs, New York, Express, in speaking of this instance, recalls another aren, more remarkable. Thirteen years ago Mrs. Henry Josephs of Pine Bluff, Ariganasa, swallowed a needle, and two weeks ago last Thursday it was picked out of a saw log in Bay City, Michigan.

A Greenback Paper For Sale.

Owing to continued ill health I have concluded to sell the Anti-Monopolist, located at Lebanon, Lasiede county, Mo , one of the oldest established and best known Greenback papers in the state, circulation one thousand, county officers Greenback and a Greenback Congressional district, A good business town, railroad trade center for a large scope of country, with immediate prospects of another railwoads I will sail chesp for cash or make arrangements so a little cash will give immediate possession, with time on balauce. sere like's prizes, pail to gird times.

The undersigned is now Agent in Miller county for a book bearing the above tame or "Aims and Aids to success and Happiness," By J. L. Haines and L. W. Yargy, acthor of Oar Home Councellor. A work adopted to those who have become indifferent to like's purposes. A comfort to those who have long traveled on this Royal Path and serving to awaken the slumbering genus within the youth, stimulate and impel, them to noble thoughts and actions and lead them to noble thoughts and actions and lead them to honor success and happiness. It is a work entirely new there being nothing like it before the public, cyury page is just alive with spatkling truth. Nearly every line has a sublime thought and fisches with only the brightest literary gome. It begins with its and endawith death sud contains every subject of interest on life's pathway.

Knowing that the work will recommend itself without 'arther description, I take pieasure in aunouncing to the people of Miller Co. that I expect to call before many days and give you a chance of a having one of the linest leterary works now in the market.

DIAL DEGRANTS.

A WONDERFUL DISCOVERY!

A Deodorized extract of Petroleum,

The Only Article that Will Bostore Hair on Bald Heads.

What the World has been Wanting for Centuries.

The greatest discovery of our day, so far as a arge porsion of humanity is concerned, is CAB-ROLING, an article prepared from petrolsam, and which affects a complete, and sadical agrain case of baldness, or where the hair, owing to discusse of the scalp, has become thin and tends to fall out, it is also a speedy restorative, and while its use securse a laxinismi growth of last, it also brings bask the natural color, and gives the most complete asefaction to the using. The falling out of the last, the accumulations of dandruft, and the premature thange in coint are all evidences of a diseased condition of the scalp and the glands which neurish the sair. To arrest these causes the article used must species medical as well as chemical virtues, and the thange must begin under the scale to be of permasent and loring broadt. Such an article is CAB-BOLINE, and, like many other wonderful discoverios, it is found to constat of olomants almost in heir namual state. Potroleum oil to the article, which is made to work such extraordinary results; but it is after it has been chemically treated and completely decolorized that it is in proper condition for the tollet. It was in far off Russia that the fact of petroleum upon the hair was first observed, Government officer having noticed that a partially add headed sorwant of his, when trimining the amps, had a habit of which the result was in a sew months a wash finer head of black, giver has not be ever had before. The oil was tried on, sorse and cattle that had look their hair from the original and the reach the result was to be ever had before. The oil was tried on, sorses and cattle that had look their hair from the original and the result was the officer and the result was tried on the cattle that had look their hair from the original and the results was a reach as they ertis plugue, and the results were, as rapid as thus were marrolons. The munes and even the tails of orses, which had fallon out, were completely se-sored in a few weeks. These appariments were. savalded to the world, but the knowledge was presically necless to the presenturely build and gray, as of one in civilized society could tolorate the nee of offined petrolemmas a desening for the hair. But the attl of one of our chamists has newcome the diffsity, and by a pressue known only to himself, he, s., after very elaborate and costly experiments, so-saided in decelerating reduct potrainum, which unders is ensecratible of loong sandled as dainty a the famous sees at subspace. The experiments will be decelerated liquid on the human hair were as. ended with the most autonishing results. A for plications, where the bais one thin and falles, are tomarkable tone and vigor to the scalp sake at. Every position of dandout disappears on is first or second dressing, and the liquid so season ag in its nature, seems to penetrate to the roofs at ore, and set up a radical change from the start. It woll known that the most beautiful colors are ands from persuloups, and, by some mysterious peration of nature, the ass of this article grade ly imparis a beautiful light-brown color, to the alreshich by continued use, despens to a black the color remains permanent for an indefinite length f they, and the clause is so gradual that the me atimate friends can scarcely datect its progress n a word, it is the troot wonderful discovery of the age, and wall exiculated to make the press erely haid and gray rejoice.

We advise our reathers to give it a trial feeling anished that one application will convince them a wonderful effects.—Filindary's Commercial Set, 22, 1817.

The article is failing its own story in the heads of homeants whit are asing it wish the most graining, and encouraging results: W. H. BRILL & Co., Fifth Average Pharmacy, sep-'We have soil' jusquantions for the hair for upon if twenty years, but have never had use to see sell or give such suitrered satisfaction. We have irrepresentation in with confidence to our fixeds ad the general public."

ad the peneral public."

Mr. Gueratus F. Hall, of the Cates Open, willos. "After six weeks" use I am now incode, as we also my commence, that your Carboniae has god to predicting a secularly provide last where I had note for years."

C. H. Server, of the Jennio Hight dombination writes: "After using your Carboniae three west rained to an conflicted that baid benefic can be re-laised it a simply wooderful in my case."

B. P. Astrona, chronier, Holyoke, Mass. writed "Your 'Carboline' has restored my hair after swap thing case had failed."
